

FortiGate® Multi-Threat Security

Firewall • VPN • Antivirus • Intrusion Prevention • Antispam • Web Filtering • Traffic Shaping

MSSP AND LARGE ENTERPRISE SYSTEMS

Product (Chassis)	FW Throughput	IPSec VPN Throughput	Concurrent Sessions	New Sessions Per Sec	IPSec VPN Tunnels (Site-site)	AV, AS, Antimalware Throughput	IPS Throughput	Max Security Policies	Number of VDOMs	Network Interfaces	Chassis Slots / Max Security Blades	Power Source	Recommended Security Blades	Max Fabric Blades
FortiGate-5140 Chassis	Up to 182 Gbps	Up to 98 Gbps	Up to 28 M	Up to 700 K	Up to 896 K	Up to 7 Gbps	Up to 56 Gbps	1400 K	Up to 7000	See modules below	14 / 14	DC/AC	12	2
FortiGate-5050 Chassis	Up to 65 Gbps	Up to 35 Gbps	Up to 10 M	Up to 250 K	Up to 320 K	Up to 2.5 Gbps	Up to 20 Gbps	500 K	Up to 2500	See modules below	5 / 5	DC/AC	4	1
FortiGate-5020 Chassis	Up to 26 Gbps	Up to 14 Gbps	Up to 4 M	Up to 100 K	Up to 128 K	Up to 1 Gbps	Up to 8 Gbps	200 K	Up to 1000	See modules below	2 / 2	AC	2	0
FortiGate-5001A-SW / -DW Module	2 Gbps (6 - 13 Gbps w/ AMC)	800 Mbps (4 - 7 Gbps w/ AMC)	2 M	50 K	64 K	500 Mbps	2 Gbps (4 Gbps w/ AMC)	100 K	Up to 500	2 GigE 10/100/1000 port and Dual or Single Width AMC slot. Support RTM-XB2 module.				
FortiGate-5005FA2 Blade	5 Gbps	800 Mbps	1 M	30 K	64 K	300 Mbps	3 Gbps	100 K	Up to 500	6 GigE SFP ports and 2 FortiAccel SFP ports				
FortiGate-5001FA2 Blade	4 Gbps	600 Mbps	1 M	20 K	10 K	250 Mbps	2 Gbps	100 K	Up to 500	2 GigE SFP, 4 GigE 10/100/1000, and 2 FortiAccel SFP ports				
FortiGate-5001SX Blade	4 Gbps	600 Mbps	1 M	20 K	10 K	250 Mbps	2 Gbps	100 K	Up to 500	4-GigE SFP, 4-GigE 10/100/1000				
FortiSwitch-5003A Switch Fabric Blade	Delivers high availability 10GbE switching for FortiGate-5140 and -5050 chassis. FortiGate-5001A with RTM-XB2 is required for 10GbE switching across the backplane.									9-10GigE SFP+, 2-GigE 10/100/100 (Mgmt)				
FortiSwitch-5003 Switch Fabric Blade	Delivers high availability switching across the high-speed chassis backplane									3-GigE 10/100/1000, 1-GigE 10/100/1000 (Mgmt)				
FortiController-5208 Load Balancing Fabric Blade	Delivers high-bandwidth load balancing for AV+IPS applications									2-10GigE XFP, 8-GigE SFP, 1-GigE 10/100/1000 (Mgmt)

The product datasheet should be consulted for the most accurate and up-to-date product specifications. The datasheet for any product or service listed within this document can be found on www.fortinet.com. Actual product performance will vary and depends on network environment and configuration. Antivirus performance is measured using HTTP protocol traffic with 32Kbyte file attachments. IPS performance is measured using UDP protocol traffic with 512 byte packet sizes.

Security • Performance • Cost • Flexibility

Fortinet® is the pioneer and leading provider of integrated network security solutions that protect your network against today's constantly changing threats. Fortinet provides solutions for the world's largest organizations, like large enterprises and service providers, to small offices with 25 users—and every size in between. Unlike providers of point products, Fortinet offers an innovative security platform that incorporates the essential security applications and services required to enable a safe and clean communications environment regardless of size. Fortinet delivers

- Better security by providing a comprehensive multi-threat security solution
- Higher performance through ASIC-acceleration
- Lower total cost of ownership (OpEx and CapEx) by integrating best-of-breed security applications into a single device

Fortinet protection solutions include a range of high-end chassis based systems, appliance-based solutions, and management and reporting tools. These capabilities allow our customers to cost-effectively protect their critical assets while delivering unparalleled flexibility in deployment.

Fortinet is the only unified security solutions provider that owns all of its technology. Fortinet solutions were built from the ground up by Fortinet to integrate multiple levels of security protection—including firewall, antivirus, intrusion prevention, VPN, spyware prevention, Web filtering, antispam and traffic shaping—providing customers a way to protect against multiple threats today and into the future.

Contact your Authorized FortiPartner or visit www.fortinet.com/partners to find a FortiPartner near you.

Fortinet Incorporated | 1090 Kifer Road, Sunnyvale, CA 94086 USA
Tel +1-408-235-7700 Fax +1-408-235-7737 | www.fortinet.com/sales

The FortiGate® family of multi-threat security appliances range in performance and physical features to meet network requirements of all sizes and topologies. Additionally, Fortinet delivers a complete line of product extensions that enable network managers to control, monitor, and operate networks simply and powerfully:

- FortiAnalyzer™ Appliances—Centralized logging and reporting that securely aggregates and analyzes log data from multiple Fortinet products
- FortiManager™ Appliances—Centralized command and control, configuration management and monitoring solution
- FortiMail™ Appliances—An enterprise-class family of specialized email security solutions providing antispam and antivirus protection

The FortiASIC™ Advantage

The FortiASIC processor is the foundation of Fortinet's unique technology. FortiASICs use an intelligent, proprietary content scanning engine that accelerates compute-intensive actions. They also contain acceleration algorithms for encryption so that FortiGate security devices can perform antivirus scanning on VPN tunnels, ensuring clean and controlled communications. Coupling our custom ASIC with proprietary network processor acceleration, Fortinet's security systems deliver improved security, extreme performance, and a compelling total cost of ownership.

FortiOS™ Operating System: Developed for Security

Fortinet's FortiOS was developed with security and performance as top priorities. FortiOS features full routing (BGP, OSPF, RIP), complete logging and auditing capabilities for forensic analysis, granular Virtual Security Domain (VDM) support, and a complete command line interface (CLI). No third party software applications are included that could lead to a vulnerability. It is Common Criteria Certified EAL 4+ and Federal Information Processing Standard (FIPS) 140-2 validated.

FortiGuard® Security Services

The FortiGuard Network is a combination of people and technology which enhance the value of Fortinet solutions. Over 100 members strong, the FortiGuard Global Threat Research Team ensure that FortiGuard Security Subscription Services are always up-to-date and providing protection from the latest threats. Delivering the latest security content is the FortiGuard Distribution Network, which is comprised of geographically dispersed systems which can optionally push updates to Fortinet devices anywhere in the world within minutes.
